About Sherbiny

We are an industrial solutions provider that has been dedicated to providing the highest quality premium products, local technical services and support to the Saudi market for over 30 years. We are a family owned and run business, and we believe that staying true to our values is important for leading a successful business.

Saudi Arabia is our home. It always has been, and always will be. We are honored to be able to invest in the future of our home and bring the greatest technologies to the local market. We are proud to be your trusted local partner.

Vision 2030 is more than just a single initiative, it is a statement of the ambition that we have as a nation, and a path towards building a better future for our children.

Sherbiny is ISO 9001, 14001, & 45001 Certified.

INVESTING IN THE FUTURE OF SAUDI ARABIA

Local Manufacturing

Sherbiny is committed to building a diversified economy in Saudi Arabia by localizing some of the best industrial technologies in the world.

Our initial focus is building mechanical industrial systems, and electrical and instrumentation equipment assembly.

A Bright Future Awaits

Sherbiny's local manufacturing and assembly facilities are built to the highest standards, and with ample space for more partners and solutions.

We believe in constantly improving our portfolio, with increasing levels of localization to advance the KSA economy.

Locally Manufactured Fluid Handling Systems

Made In KSA

Rasana by Sherbiny is a regional leader in delivering turn-key integrated industrial systems such as chemical dosing skids as well as steam & water analysis systems.

We offer complete design, fabrication, and installation of our locally manufactured & assembled systems from conceptual design to operational readiness. All of our solutions combine industry leading equipment and a full range of technical services and aftermarket support.

Robust & Reliable Industrial Systems

- Complete Turn-Key Solutions
- Modular Standardized Skid Packages
- High-Quality & Quick Development
- Reduced Cost
- Excellent Technical Services & Support
- Premium Reliable Equipment

Main Areas of Expertise

- Chemical Dosing Skids
- Steam & Water Analysis Systems
- Fluid Transfer Skids
- Filtering & Separation Skids
- Pump Stations
- Heat Exchanger & Filter Skids
- Metering & Manifold Skids
- Feasibility Studies, Cost Estimation
- Engineering Design & Management

Engineering Services

- Design Analysis
- Customized Explosion-Proof Design
- Front-End-Engineering Design (FEED)
- Detailed 3D Design & Project Execution
- As-Built Reconciliation
- FAT and SAT Support
- Commissioning and Handover
- Material Selection Services

Local Manufacturing & Assembly

- Building a Stronger Future Together
- Highest International Standards
- Installation & Commissioning
- Premium Equipment & Spares
- Local Services (Khobar & Yanbu)
- Aftermarket Services & Support

Locally Assembled Electrical & Instrumentation Equipment

Made In KSA

Atheel by Sherbiny is dedicated to providing premium electrical and instrumentation solutions complete with **locally assembled products** and a full range of technical services and aftermarket support.

Our initial range of products include:

- Fixed Gas Detection Devices and Systems (H2S & LEL)
- Audible & Visual Signalling Devices
- Public Address and General Alarm (PAGA) Systems
- Fire Safety Devices and Systems

Fixed Gas Detection

- Fixed H2S (Smart EC) detectors
- Fixed LEL detectors (Digital CB)
- Assembly, testing, and calibration
- Single or Dual Sensors
- Latest technology - GM S5000
 - 24 Month Calibration Cycle
 - Dual Sensors
 - Diffusion Supervision (H2S)
 - Self-Checking Feature

Custom Modular Monitoring Systems

- Complete Turn-Key Solutions (Assembly, Installation, Commissioning, Testing)
- Integrated safety monitoring
 - Microcontroller based control modules
 - Live insertion removal of control modules
- Zero Two can monitor combinations of:
 - Combustible gases, H2S, Flame, Toxic, O2
- Assembly of Alarming Devices Included

Signaling / Siren / PAGA

- Complete PA/GA systems
- Intelligent Software & Robust Hardware
- Longest Tested Full Capacity Amplifiers
- Real-Time Field Diagnostic & Monitoring
- Modular & Light-Weight design
- Reduced Cost (Integrated MDF Option)
- DNV Approved & IP Network Compatible
- Easy servicing through access panels

Fire Safety Systems

- IP-Addressable Detection Systems
- Integrated Fire & Gas Detection
- SIL2 Approved
- Cost Saving (Networking & Loop Distribution)
- Self-Verify Technology
- Reduced Operating Expense
- Quick Setup & Installation
- Stove Guard / Smart Smoke Alarm
